PHYSICAL INVENTORY VERIFICATIONS

What is Physical inventory verification?

A physical inventory verification can be a critical step in ensuring that all the assets of a business are accounted for and properly recorded.

By conducting a thorough physical inventory, businesses can ensure that they are accurately tracking assets and liabilities, and that any discrepancies are identified and corrected as soon as possible.

Why its important to a businesses?

*to ensure that it is done correctly in order to avoid any inaccuracies or errors.

*ensure the records are accurate and up to date, and any discrepancies are immediately identified and corrected
